
C_12709_Anlage - ePA: Meldung von Produktdetails

Änderungen in I_Authorization_Service.yaml

Es wird eine neue Version der Operation `sendAuthCodesSC` mit dem Namen `sendAuthCodesSCv2` definiert.

In der description wird folgender Text ggü. `sendAuthCodesSC` geändert

sendAuthCodesSC:

The VAU user pseudonym as generated for the vau-channel (see: vau protocol) shall be returned in a successful operation response.

sendAuthCodesSCv2:

The VAU user pseudonym as generated for the vau-channel (see: vau protocol) and the version information for the product are returned in a successful operational response.

Ein neues Schema für die Response wird definiert und um die Versionsinformation ergänzt:

```
AuthorizationResponseSC200v2:
  description: "OK, Successful login"
  headers:
    X-Request-ID:
      $ref: '#/components/headers/requestid'
  content:
    application/json:
      example:
        vau-np:
c9a7289e763616d449886acdeb8b83d115881c5d078b8643d112190bc7516584
        capabilities:
          ProductVersion: "6.0.0"
          ProductTypeVersion: "3.1.3"
        schema:
          type: object
          properties:
            vau-np:
              $ref: '#/components/schemas/VauUserPseudonymType'
            capabilities:
              type: object
              description: Information about current versions of product, services and
components of the health record system.
              properties:
                ProductVersion:
                  description: Product version of the health record system
                  $ref: '#/components/schemas/VersionInfoType'
                ProductTypeVersion:
                  description: Product type version of the health record system
                  $ref: '#/components/schemas/VersionInfoType'
              required:
                - ProductVersion
                - ProductTypeVersion
          required:
```

52 - vau-np
53 - capabilities

54

55 **mit:**

56 VersionInfoType:
57 description: Version information of a service or component
58 type: string
59 pattern: '^(?:[1-9]\d?|\d)\.(?:[1-9]\d?|\d)\.(?:[1-9]\d?|\d)(?:-(?:[1-9]\d?|\d))?\$'
60 example: "1.2.3"
